Kampala 11 December 2006

PRESS RELEASE

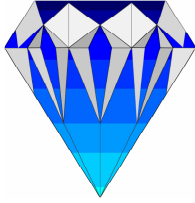

UGANDAN SOFTWARE FOR IRAQ

Three Iraqi micro-finance organizations - Al Bashair in Bagdad, Al Inma in Falluja and Al Aman in Kirkuk – have obtained Loan Performer, a Ugandan microfinance software product. During the last 2 weeks these organizations have been trained in using the product by Mr. Eddy Wamushya, a trainer of Crystal Clear Software Ltd, producers of the software. The acquisition was made possible through financial assistance from the USAID Iraq Private Sector Growth and Employment Generation Project Mansour in Baghdad, Iraq.

Crystal Clear Software Ltd is very happy with the extension of its clientele into this part of the world. “We already have installed our software in some 50 different countries all over the world, but in the Arab peninsula, we were limited to just Turkey and Syria where we have 3 clients”, says Hans Verkoijen, managing director of Crystal Clear Software Ltd, “and we are also glad that we can bring some positive news about Iraq”.

Loan Performer is a micro-finance software product that handles shares, savings deposits, loan tracking and accounting. It is a very popular product, being used by some 200 rural banks, cooperatives, village banks and micro-finance institutions all over the world. Crystal Clear Software Ltd is a Ugandan company, registered in 1998 with its main purpose the development, sales and support of Loan Performer.

More information can be obtained from:

To the Ugandan Press

Re: INVITATION FOR A PRESS CONFERENCE

Dear Sir/Madam

Our company would like to invite you for a press conference regarding a consultancy we did to assist 3 Iraqi micro-finance institutions with our software.

The press-conference will be conducted on Monday 11 December 2006 at 4 PM at our office. You will be able to ask questions to the senior consultant who undertook the mission, about the challenges that are being faced in undertaking our work in Iraq.

Yours truly,

Julius Sebbale
Marketing Manager
